WAMBOGO HASSAN SADAT

Full-Stack Software Developer & Technical Community Leader
Kampala, Uganda | +256 786 021 431 | wambogohassan63@gmail.com
Portfolio: wambogohassansadat.dev | GitHub: Chemistry2i |
LinkedIn: https://www.linkedin.com/in/wambogo-hassan-sadat-895544376/

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Developer and Information Systems undergraduate with extensive hands-on experience building scalable web applications, blockchain-integrated e-voting systems, and AI-powered agricultural platforms. Proven technical leader serving as President of the Kyambogo University Computer Science Association and Lead Developer for Concept Crashers, combining strong software engineering expertise (MERN stack, Java Spring Boot) with community mentorship and project management.

SKILLS & COMPETENCIES

- Languages: JavaScript, Python, Java, HTML5, CSS3, SQL
- Frontend & Backend: React, Node.js, Express.js, Java Spring Boot, REST APIs
- Databases & Cloud: MongoDB, MongoDB Atlas, Azure, Render, Vercel
- DevOps & Tools: Git, GitHub, Linux Mint, VS Code, Web3 / Polygon Blockchain

---

LEADERSHIP & EXPERIENCE

President
Kyambogo University Computer Science Association (KYUCSA) | *May 2026 – Present*

- Lead student governance, organizing technical instruction workshops on Python, data science tools, and Git/GitHub fundamentals for university members.
- Coordinate institutional partnerships and community initiatives alongside association patrons and tech stakeholders.

Lead Developer
Concept Crashers Development Team | *July 2025 – Present*

- Direct software architecture and multi-developer teams on high-impact hackathon entries and production web applications.
- Spearheaded the technical delivery of award-winning systems combining modern web frameworks and machine learning components.

Software Engineering Intern
Peculiar Technologies | *August 2025*

- Engineered responsive React user interfaces and participated in complete Software Development Life Cycle (SDLC) workflows.
- Authored UML system models and contributed to backend database integration tasks.

KEY PROJECTS

Campus Ballot (E-Voting Platform)

- URL: campusballot.tech
- Tech Stack: React, Node.js, Express, MongoDB, Render, Polygon Blockchain
- Developed and deployed a secure campus e-voting system featuring custom DNS routing and an integrated Jotform AI assistant (Campus Vote AI).
- Integrated Polygon blockchain functionality to ensure immutable, on-chain vote recording for student elections.

AgriBuddy (AI Agricultural System)

- Tech Stack: Full-Stack Web, AI/ML Components
- Architected an AI-powered agricultural management platform, winning an award at the 5th Kyambogo University STEAM Festival (April 2026).

Concept Score

- Designed a 5-layer trust infrastructure proposal targeting SME credit scoring for the Bank of Uganda Hackathon, focusing on dynamic data pipelines and risk assessment models.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Systems
Kyambogo University, Kampala, Uganda | *Expected Graduation: ~2027*

- Relevant Coursework: Systems Analysis, Database Management, Object-Oriented Programming, Software Engineering.

Certifications & Professional Badges:

- GitHub Foundations (GH-900)
- Cisco Networking Academy & Credly Verified Badges (CCNA Introduction to Networks, JavaScript Essentials 1 & 2, Version Control with Git & GitHub)
- Java Fundamentals - Frontend Masters
